Digital Marketing Analysis

Topic: Global Quantum Summit 2025

1. Target Audience

- Influential leaders
- Researchers
- Investors
- Emerging talent

2. Channels Used

- **Website:** Information and registration
- **LinkedIn:** B2B professional networking & lead generation
- **Twitter/X:** Real-time updates
- **Email:** Direct communication & personalized offers

3. Content Quality

- **Visuals:** High-quality & consistent branding
- **Storytelling:** Showcasing the quantum revolution

4. Engagement Metrics

- **Website Analytics:** Monitor traffic and user behavior
- **Social Media:** Analyze growth and reach
- **Email:** Track open rates and CTR (Click-Through Rate)

5. Call to Action (CTA)

- **Clarity:** Concise & action-oriented commands
- **Effectiveness:** High conversion rates

6. SEO/SEM

- **Keyword Usage:** Targeting top-level and niche quantum terms
- **Paid Ads:** Optimized ads for CTR (Click-Through Rate) & CPA (Cost Per Acquisition)

Analysis:

Strengths

- Announcement of high-caliber speakers
- Strategic partnerships with the UN
- Mobile-optimized registration process

Weaknesses

- Lack of interactive content like live Q&A
- Not utilizing podcasts
- Content was not personalized

Recommendations

- Implement pre-summit webinars
- Launch "**Quantum Insights**" podcast
- Develop personalized content
- Leverage user-generated content

Exploring Google Webmaster

1. Objectives

- To explore Google Search Console and understand its role in digital marketing.

2. Prerequisites

- Google account.

3. Tools Required

- Google Search Console (<https://search.google.com/search-console>)

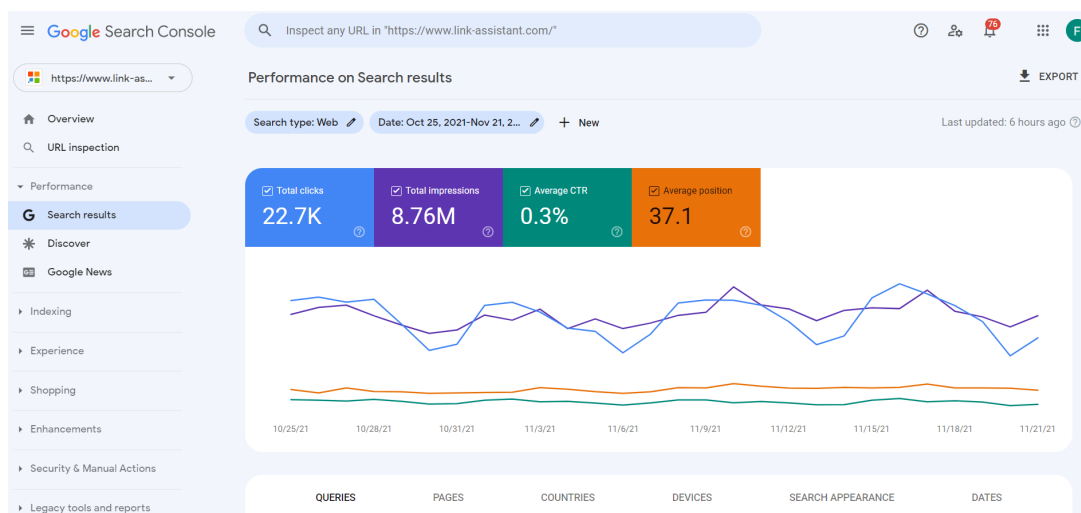

4. Steps

1. Log in to Google Search Console.
2. Add a property using a dummy or personal website/blog URL.
3. Skip or complete ownership verification as applicable.
4. Explore the dashboard, noting key SEO metrics like clicks, impressions, CTR.
5. Take screenshots and document how these insights help SEO efforts.

5. Result

- Became familiar with Google Search Console's interface and core SEO metrics.

6. Output

Ex: 3

Date: 15-7-25

Working with Ad Placement in Google Ads

1. Objectives

- To understand ad placement targeting in Google Ads campaigns.

2. Prerequisites

- Basic knowledge of digital marketing and advertising.

3. Tools Required

- Google Ads account.
- Computer with internet access.

4. Steps

1. Sign in to Google Ads.
2. Create a Display campaign and select an objective.
3. Set placements for targeting specific websites and channels.
4. Enter a daily budget for simulation (do not publish).
5. Take screenshots and document your findings.

5. Result

- Practiced targeting specific audiences using ad placements in Google Ads and understood their impact on campaign focus.

6. Output

Weekly estimates for your new daily budget

	Budget	Clicks	Cost	Impr.	Top Impr.	Conv.	Conv. value
☐	\$324.08/day	19	\$660.70	725	630	14	14.23
☐	\$89.57/day	13	\$241.00	532	498	11	10.69
☒	\$50.00/day (current)	8	\$134.37	415	385	8	7.86
☐	\$29.88/day	6	\$80.15	357	329	6	6.42
☐	\$ Set a different budget

Explore Working of Googlebot

1. Objectives

- To understand how Googlebot crawls and indexes websites.
- To simulate how Googlebot views webpage content.

2. Prerequisites

- Basic SEO knowledge.
- Basic HTML understanding.

3. Tools Required

- Text editor.
- Web browser.
- Internet connection.

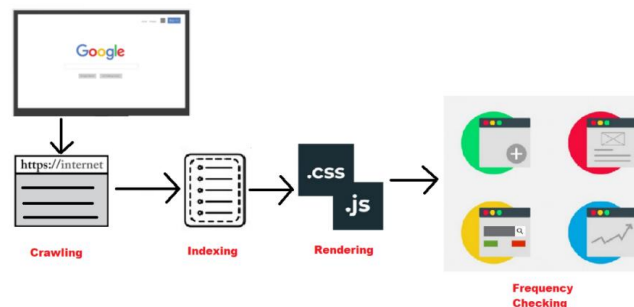

4. Steps

1. Read official Googlebot documentation.
2. Create and save a basic HTML page.
3. Use Inspect tool to view HTML as a crawler would.
4. Add a robots meta tag to control crawling and indexing.
5. Write a brief note on Googlebot's functioning.

5. Result

- Learned how Googlebot views, crawls, and indexes a simple HTML page

6. Output

Ex: 5

Date: 5-8-25

Create a Basic HTML Page

1. Objectives

- To create a basic HTML page with SEO-friendly elements.

2. Prerequisites

- Basic HTML knowledge.

3. Tools Required

- Text editor (e.g., Notepad++, VS Code).
- Web browser (e.g., Chrome, Firefox).

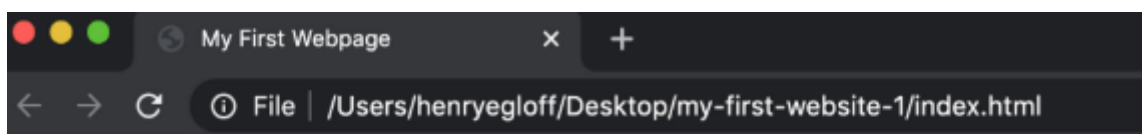

4. Steps

1. Open a text editor and create a new file named seopage.html.
2. Write HTML code with title, meta description, meta keywords, and robots meta tag.
3. Save the file and open it in a browser.
4. Verify that all SEO elements are present in the HTML code.
5. Document the importance of each SEO tag.

5. Result

- Successfully created a basic HTML page with essential SEO-friendly elements.

6. Output

My First Webpage

Hi, my name is Henry and this is my first website. I am interested in:

- Web design
- Coding
- Digital art

Ex: 6

Date: 12-8-25

Incorporate Google Search in your Webpage

1. Objectives

- To add a Google Custom Search Engine to a webpage.
- To improve user navigation and searchability.

2. Prerequisites

- HTML knowledge.
- Google account.

3. Tools Required

- Text editor.
- Google Programmable Search Engine.
- Internet connection.

4. Steps

1. Create a custom search engine for a sample site.
2. Copy the JavaScript embed code.
3. Insert the code into the <body> of seopage.html.
4. Save and open in a browser to test.
5. Write a note documenting the purpose.

5. Result

- Successfully embedded a Google Custom Search bar into a webpage

6. Output

Ex: 7

Date: 20-8-25

Analyse Facebook Marketplace

1. Objectives

- To analyse Facebook Marketplace as a digital marketing platform.
- To understand marketing strategies used by sellers on Marketplace.

2. Prerequisites

- Facebook account.
- Basic understanding of online marketplaces.

3. Tools Required

- Facebook website or app.
- Internet-enabled device.

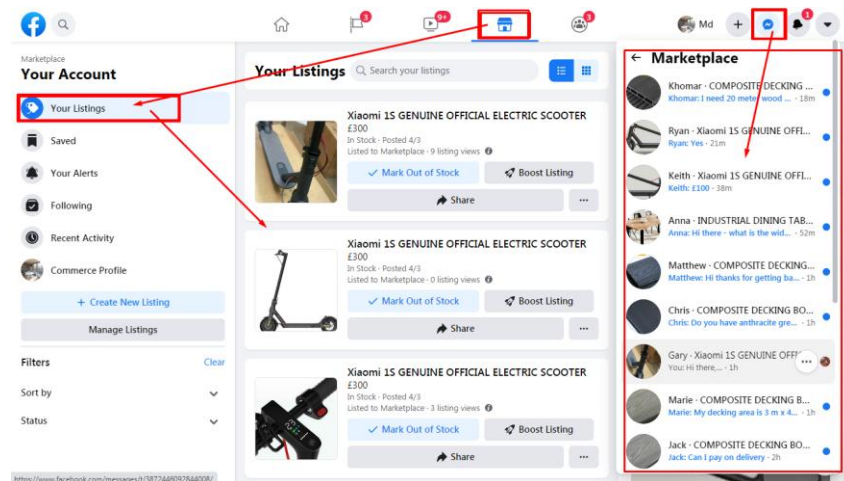

4. Steps

1. Log in and access Facebook Marketplace.
2. Browse product categories and listings.
3. Identify effective marketing elements in listings.
4. Write a report on Marketplace's marketing potential.

5. Result

- Gained insight into marketing strategies and user engagement on Facebook Marketplace.

6. Output

Ex: 8

Date: 27-8-25

Create a Facebook Advertisement Account

1. Objectives

- To set up a Facebook Ads account and explore its features.
- To learn the basics of creating and managing Facebook advertisements.

2. Prerequisites

- Facebook account.
- Basic knowledge of digital advertising.

3. Tools Required

- Facebook Ads Manager or Meta Business Suite.
- Internet-connected device.

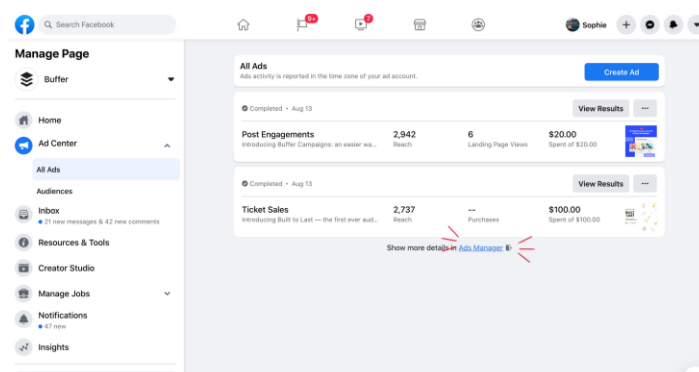

4. Steps

1. Log in to Facebook Ads Manager.
2. Create or access an ad account.
3. Connect a Facebook Page.
4. Explore ad settings for targeting and budgeting.
5. Prepare a draft ad campaign.
6. Document the setup steps with screenshots.

5. Result

- Successfully set up a Facebook Ads account and understood the ad creation process.

6. Output

Ex: 9

Date: 3-9-25

Explore Webhosting & Domains

1. Objective

To explore domain names and web hosting by registering a free domain and hosting a sample webpage.

2. Prerequisites

Internet access; accounts on Freenom and GitHub.

3. Tools Required

Web browser; Freenom; GitHub Pages.

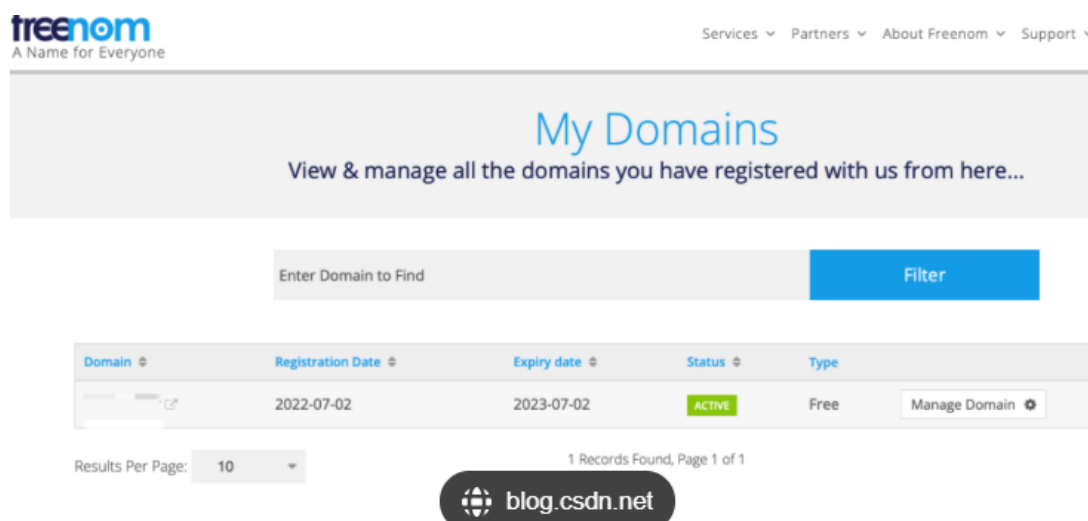

4. Steps

1. Registered a free domain via Freenom.
2. Hosted an HTML page on GitHub Pages.
3. Mapped the domain to GitHub Pages via DNS settings.
4. Verified the site was live and accessible.

6. Result

Successfully hosted a sample webpage using GitHub Pages mapped to a free domain; learned the integration of domains and hosting.

6. Output

The screenshot shows the Freenom website interface. At the top, the Freenom logo and navigation links are visible. The main heading is "My Domains" with a subtext "View & manage all the domains you have registered with us from here...". Below this is a search bar with the placeholder "Enter Domain to Find" and a blue "Filter" button. A table lists the registered domains with columns for Domain, Registration Date, Expiry date, Status, and Type. One domain is listed with a registration date of 2022-07-02, an expiry date of 2023-07-02, and a status of "ACTIVE". The table also includes a "Manage Domain" button. At the bottom, there is a "Results Per Page" dropdown set to 10 and a footer indicating "1 Records Found, Page 1 of 1". A watermark for "blog.csdn.net" is visible in the bottom right corner.

Domain	Registration Date	Expiry date	Status	Type
example.com	2022-07-02	2023-07-02	ACTIVE	Free

Ex: 10

Date: 18-9-25

Multi-Page Website using HTML

1. Objective

To design and implement a multi-page website using HTML, following SEO best practices for content structure, navigation, and meta tags.

2. Prerequisites

- Basic HTML knowledge
- Understanding of SEO fundamentals (titles, meta tags, navigation)
- Familiarity with using a text editor and browser

3. Tools Required

- Text editor (Notepad++, VS Code)
- Web browser (Chrome, Firefox)

4. Steps

1. Plan the Website Structure

- Decide on key pages (e.g., Home, About, Services, Contact, Blog).
- Sketch a navigation flow connecting each page.

2. Set Up HTML Files for Each Page

- Create separate .html files: index.html, about.html, services.html, contact.html, blog.html.

3. Add Semantic HTML and SEO Elements

- Use <header>, <nav>, <main>, <section>, and <footer> appropriately.
- Insert <title>, <meta name="description">, and <meta name="keywords"> in the <head> of each page.
- Ensure each page has a unique <h1> tag describing its main purpose.

4. Implement Consistent Navigation

- Add the same navigation bar with links to all main pages on every file.

5. Interlink Pages with SEO in Mind

- Link between pages using descriptive anchor text (e.g., “Learn about our Services” instead of “Click here”).

6. Test in Browser and Validate

- Open all pages in a web browser and ensure navigation works, all content is accessible, and meta tags are present and correct for each file.

5. Code:

Index.html

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>Home | Simple SEO Website</title>
  <meta name="description" content="Welcome to our simple multi-page website.">
</head>
<body>
  <header>
    <h1>Home Page</h1>
    <nav>
      <a href="index.html">Home</a> |
      <a href="about.html">About</a> |
      <a href="services.html">Services</a> |
      <a href="contact.html">Contact</a> |
      <a href="blog.html">Blog</a>

```

```

<meta name="description" content="Read our latest articles and updates.">
</head>
<body>
  <header>
    <h1>Blog</h1>
    <nav>
      <a href="index.html">Home</a> |
      <a href="about.html">About</a> |
      <a href="services.html">Services</a> |
      <a href="contact.html">Contact</a> |
      <a href="blog.html">Blog</a>
    </nav>
  </header>
  <main>
    <article>
      <h2>Welcome to our Blog!</h2>
      <p>This is where you'll find our latest updates and articles about SEO and web
development.</p>
    </article>
  </main>
  <footer>
    <p>&copy; 2025 Simple SEO Website</p>
  </footer>
</body>
</html>

```

6. Result

A multi-page HTML website was constructed, featuring SEO-friendly structure, meta information, and navigation. Webpages were easily crawlable, and internal linking plus semantic HTML improved user and search engine access.

7. Output
